

questprofile.com

QUEST® Profile is one of the leading brands for high-quality soft PVC products such as stair profiles, stair railings, floor edgings, and angle profiles.

QUEST® is a fully Polish brand. As a manufacturer with more than 20 years of experience and a distributor, we operate efficiently in the challenging, extensive European market, offering our customers competitive quality, prices and flexible, efficient forms of delivery.

We work with both B2C private customers and B2B business customers. Our focus has always been on the highest quality and advanced technology, which allows us to consistently hold all products to a high standard. We are confident in the robust manufacturing of all products, which is why we protect them with patents.

Our products are made in Poland and go directly to customers throughout Europe. Thanks to our many years of experience in online sales, we offer our customers efficient order processing, no matter where they are in Europe. Our delivery methods have proven themselves throughout the European Union. We guarantee convenient payment methods and terms of cooperation.

We are close, so we can listen carefully and quickly respond to customer needs.

Q STAIR PROFILES

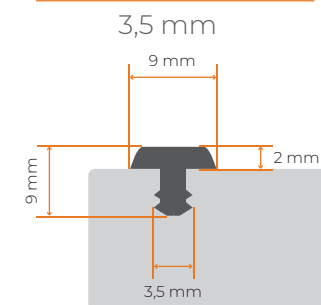

Non-slip & Grooved

USE AND PROPERTIES:

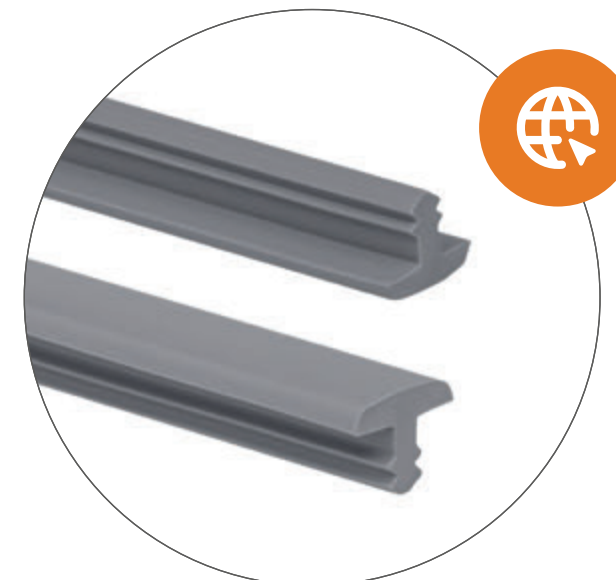

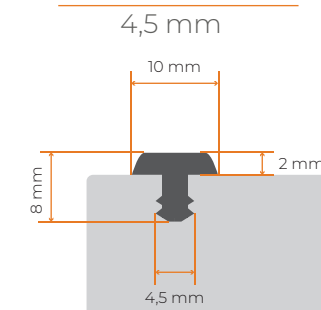

- Durable and functional – profile made of high-quality PVC, designed for stairs and walkways, even with heavy traffic,
- Easy assembly – this model stays in place thanks to specially designed bridges, just place it in a previously prepared milling cutter,
- Protects against falling and slipping - the presence of profiled, firmly embedded slats increases grip even on smooth stone or wooden surfaces,
- An aesthetically pleasing design and a wide range of colours – you can easily match the right profile for the surface and application,
- Maintenance-free – PVC is easy to clean and retains its original form for a long time,
- For individual cutting – change the length of the slats as you like by cutting them with scissors.

DURABLE, AESTHETIC
AND EASY TO INSTALL
GROOVED PROFILE -
IDEAL FOR SAFETY ON
STONE AND WOODEN
STAIRS.

HANDRAILS

PVC RAILING PROFILES
– HIGH-QUALITY, EASY
TO INSTALL, AESTHETIC
AND AVAILABLE IN A
WIDE RANGE OF
COLOURS. AN EASY
WAY TO CHANGE YOUR
BALUSTRADE

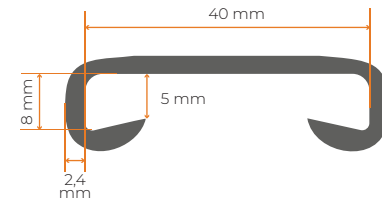

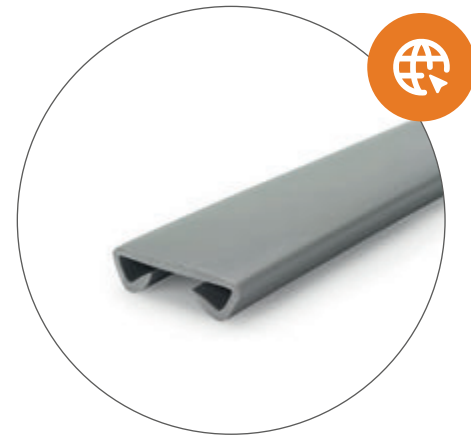

USE AND PROPERTIES:

- High-quality handrail profiles made of soft PVC, placed on the flat bar of the staircase railing,
- Ideal for apartment buildings, detached houses and office buildings,
- They give traffic routes an appealing look,
- They are available in different colours and dimensions, which allows them to match any interior or facade style,
- Made of soft PVC, which is a thermoplastic material – this makes installation quick and easy, without the need for specialised tools,
- They fit perfectly into the curves without the need for cutting, creating an aesthetic appearance. After installation and during use, no creases or protrusions are created that could cause injury to users,
- They are maintenance-free and easy to clean, ensuring a great appearance for years to come,
- The use of PVC handrail cladding not only improves functionality and safety, but also livens up the interior and adds aesthetics.

SOFT ANGLE PROFILE

HIGH-QUALITY ANGLE PROFILES FOR USE AS A COVER FOR EXTERNAL AND INTERNAL EDGES, ENSURING DURABILITY AND AESTHETIC APPEARANCE.

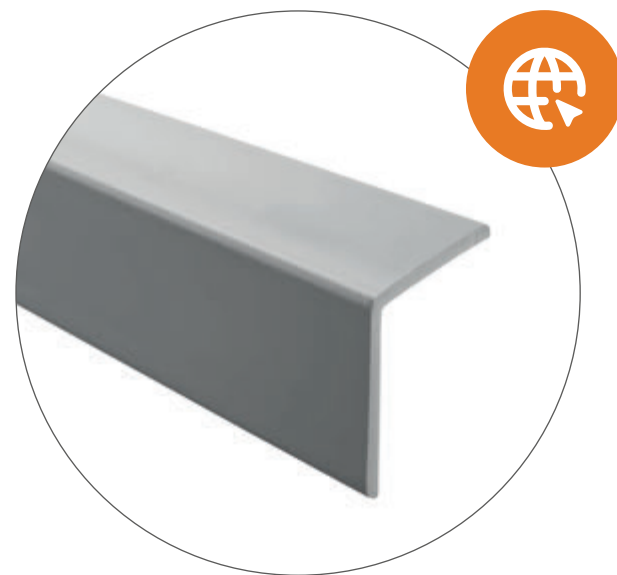

USE AND PROPERTIES:

- Protect corners from damage - act as a bumper in the garage, parking hall parking lot, places with heavy traffic.
- They ensure the absorption and distribution of the energy of a potential impact, protecting the layer underneath them.
- They shield the edges from dirt, scratches, chips.
- They are a warning element - especially in the case of models with intense colors.
- They are great for finishing the door frame.
- The same color and smooth surface on both sides of the angle, fashionable colors that will work well in many interiors.
- Velvet texture allows for quick and trouble-free cleaning
- Easy installation on painted walls, tile, terracotta, wood, metal, plastics.

STAIRS SYSTEM

HIGH QUALITY
PATENTED SET OF
ELEMENTS FOR
FINISHING AND
PROTECTING THE
EDGES OF THE STAIRS

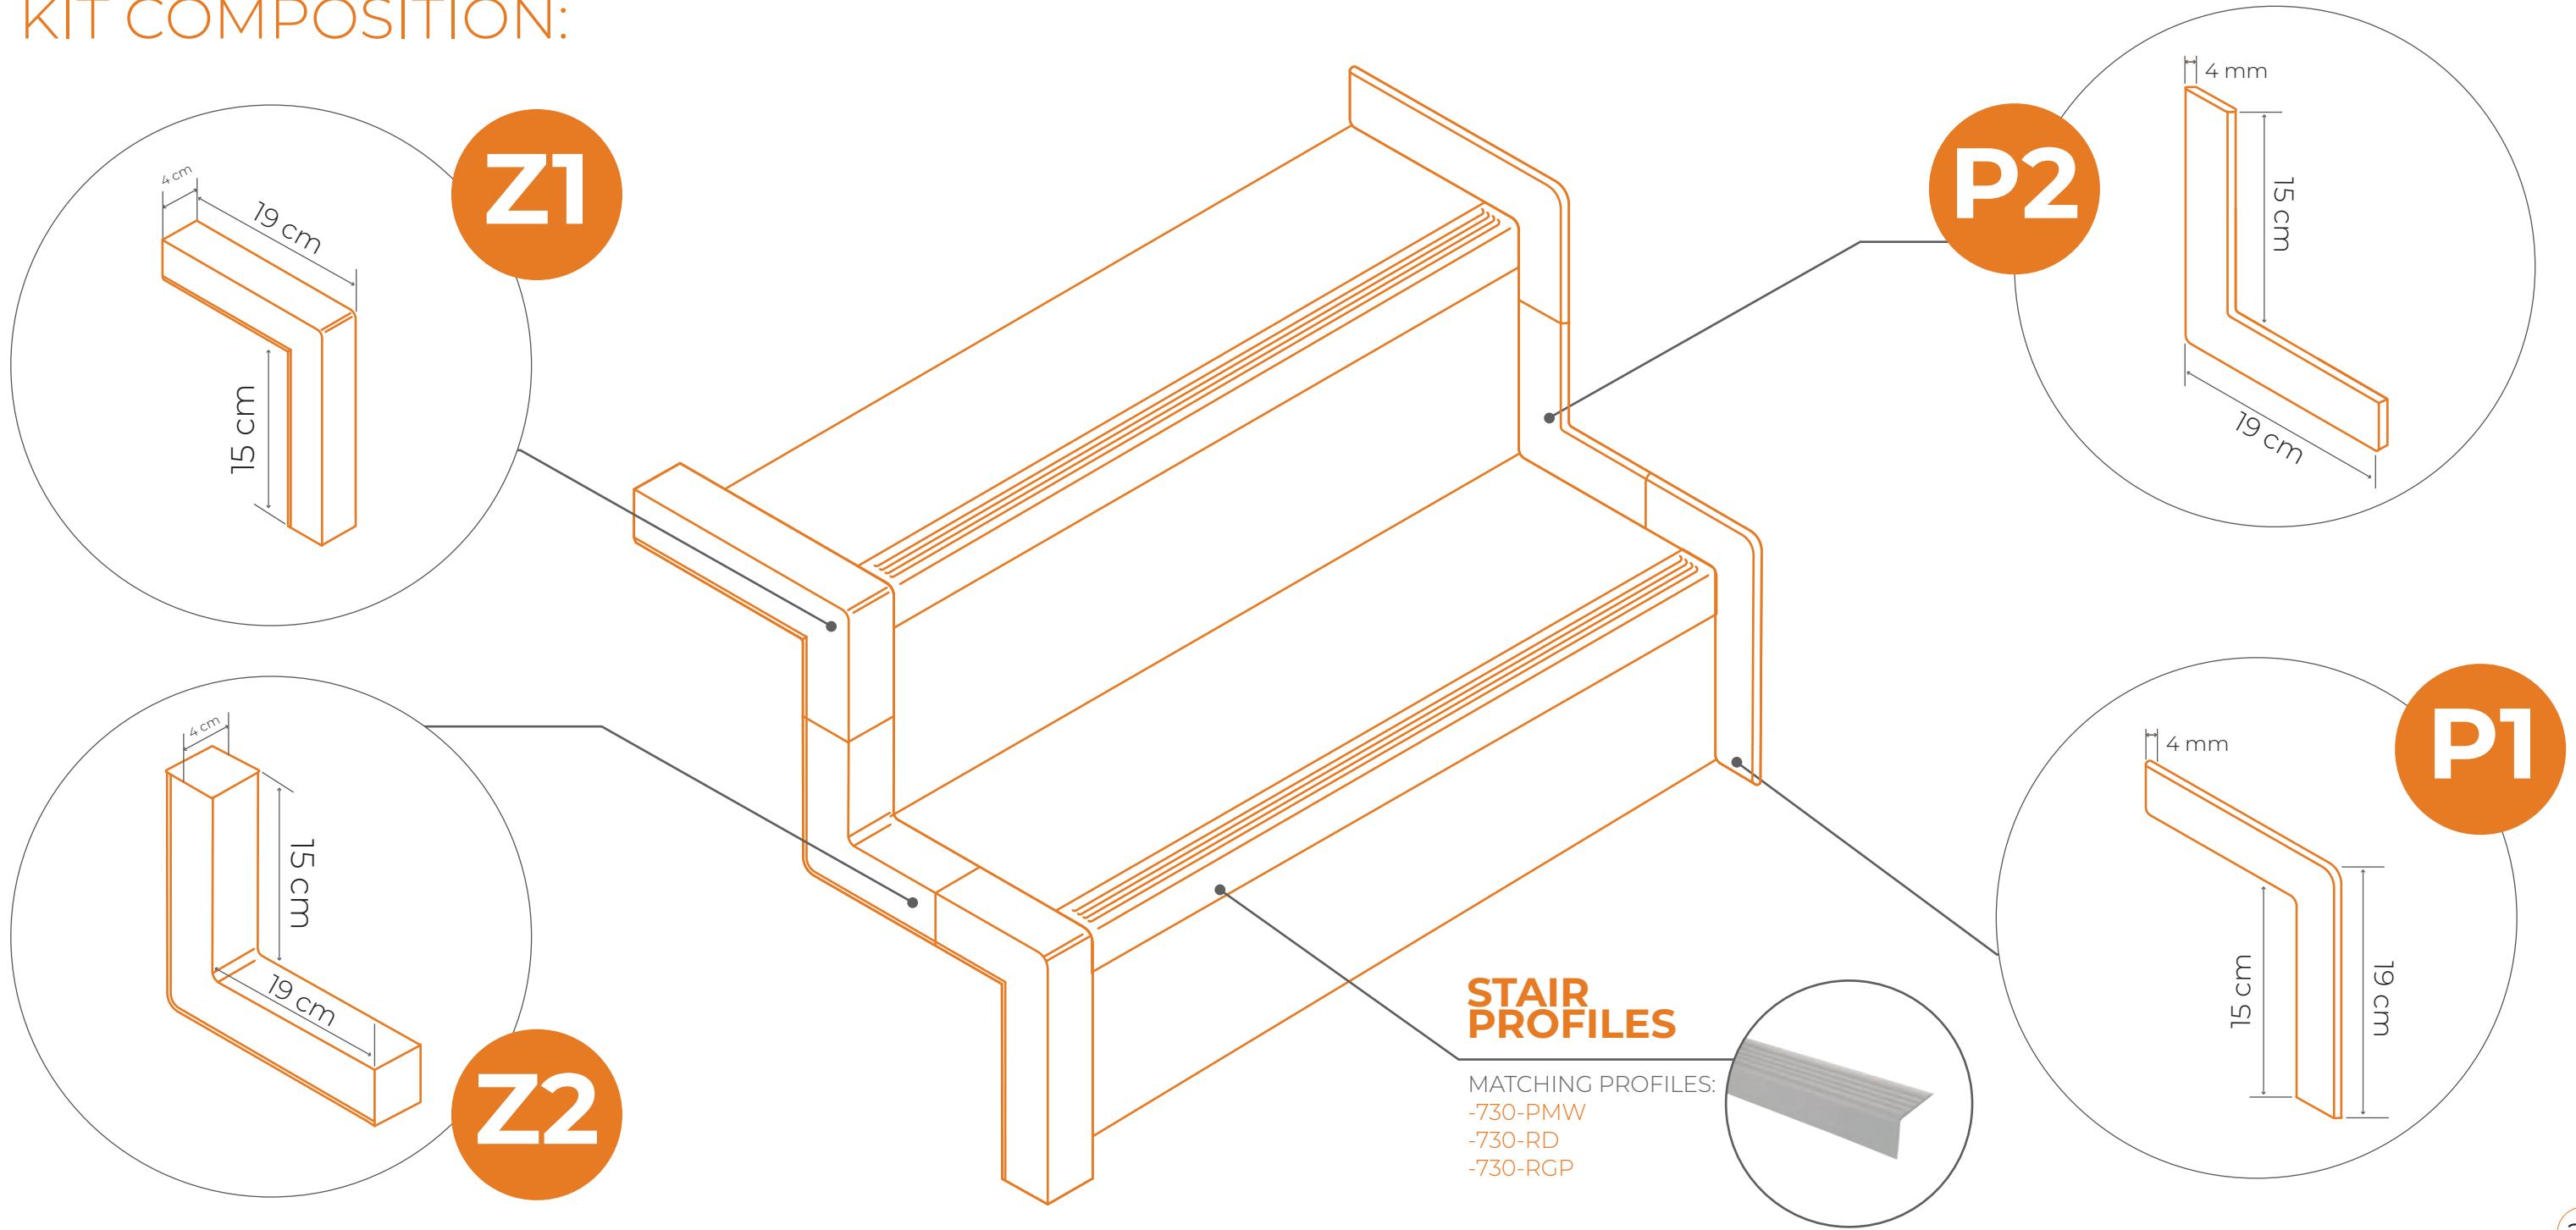

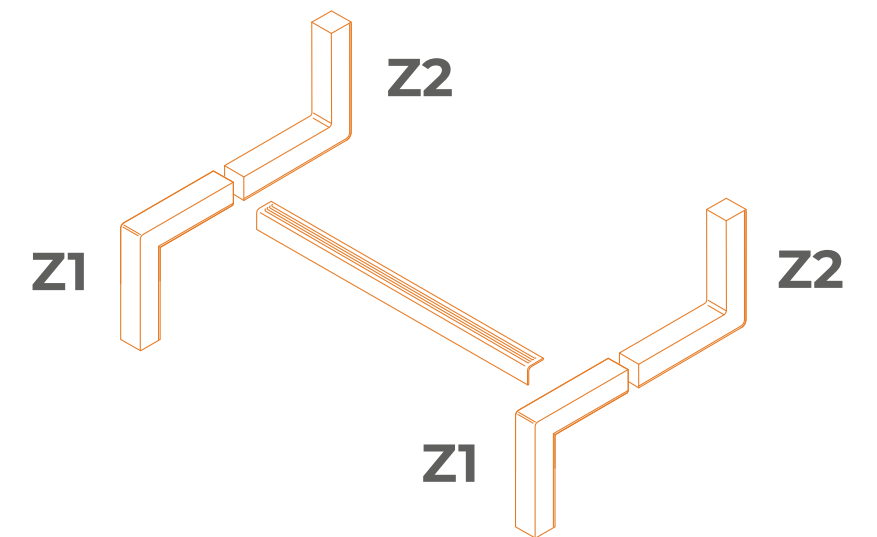

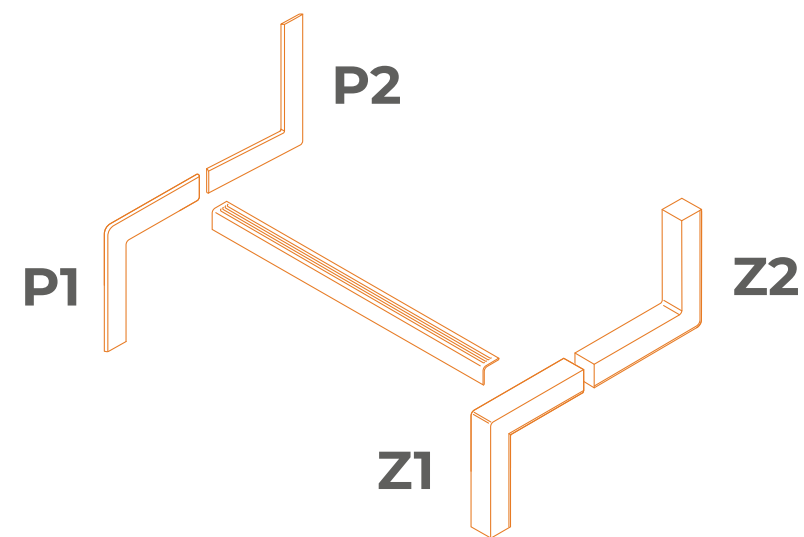

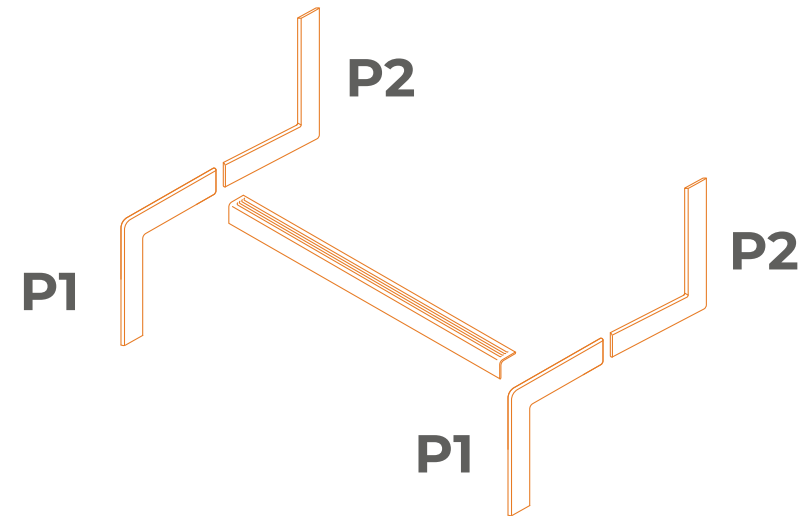

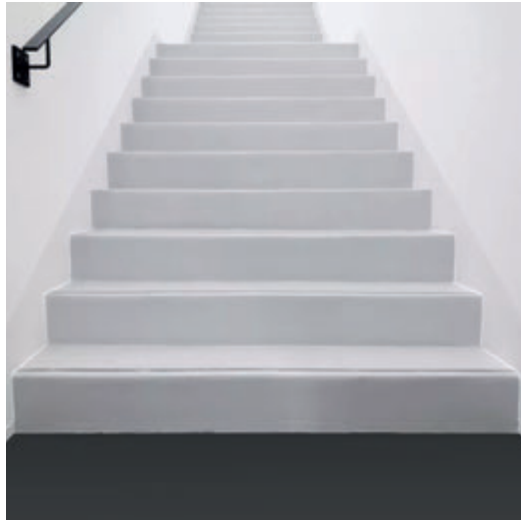

USE AND PROPERTIES:

- Complete set of 5 elements per step, including stair profile.
- Available in 3 variants depending on the layout of the steps, and in each of them to choose from 5 colors and 3 types of stair nosings.
- Protects against slipping and falling - the grooved part of the trim ensures safe use of the stairs.
- Creates an aesthetic finish to the steps.
- Protects the edges and sides of the steps from mechanical damage.
- Protects against streaks and dirt during cleaning and use.
- Has an increased number of ripples compared to other products on the market.
- Highly flexible product - "shape memory".

KIT COMPOSITION:

Colors

SEALS

WEATHER- AND
UV-RESISTANT SEALS.

USE AND PROPERTIES:

WINDOW SILL / WINDOW SEAL:

- Effectively seals the connection point between the window sill and the window - reduces the loss of heat in the room.
- Perfectly matched - flexible and expanding - will fit exactly to the edges of the window sill.
- Easy cutting - you will cut the appropriate sections yourself with scissors.

GASKET FOR POLYCARBONATE:

- Used to seal the joints of polycarbonate panels.
- Facilitates the installation of polycarbonate panels, providing a durable and aesthetic finish, protects against the ingress of moisture and dirt.
- Provides excellent thermal and acoustic insulation.

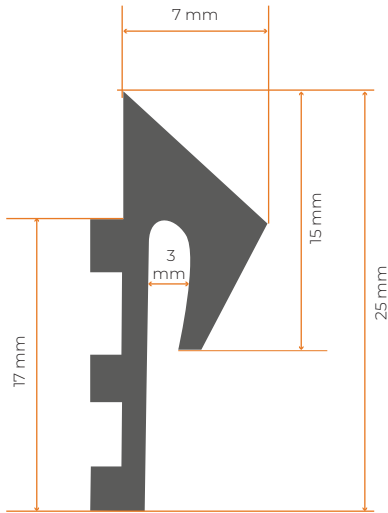

TRANSPORT SEAL:

- Effectively seals the place where the sill connects to the window - reduces heat loss in the room.
- Perfectly matched - flexible and expanding - will fit exactly to the edges of the window sill.
- Easy cutting - you will cut the appropriate sections yourself with scissors.

SHEARS

HIGH-QUALITY,
MULTIFUNCTIONAL
SHEARS FOR STRAIGHT
AND ANGLE CUTTING OF
FINISHING MATERIALS.

USE AND PROPERTIES:

- Durable blades - made of hardened high-carbon steel, precisely ground with CNC technology.
- Precise cutting - quick angle setting system (0°, 15°, 30°, 45°) with solid support for the material.
- Robust construction - chrome-plated body made of thick steel plate providing durability and stability.
- Ergonomic handle - covered with double-layer PVC, with non-slip surface for greater comfort and safety at work.
